Our global footprint is in middle East , East Asia, Europe and USA.

We are the global leader on Plant Tissue culture technology with Integrated Production Management System in more than 65 types of plants with annual production capacity of 30 million Tissue Culture Saplings.

Plant Tissue Culture Technology is the only promise to satiate customer's demand of various plants around the globe with promise of quality and quantity on time.

GLOBAL LEADER ON PLANT TISSUE CULTURE TECHNOLOGY WITH INTEGRATED PRODUCTION MANAGEMENT SYSTEM

Ishved Biotech is one of the largest plant tissue culture Unit of international standards built on 50 hectares of land, in Maharashtra, India

HI-TECH LAB FACILITIES

Hi-Tech Inoculation Theater

- Lab Facility- Class 100000 Aseptic rooms having 120 Laminar Air Flow work stations
- Mega Sterilization Unit-20000 Culture bottle+ 2000 Liters medium/day
- Hi-tech Inoculation Theatre
- 20 Plant Growth Rooms having 4.2 million culture capacity
- Excellent automatic control for aseptic condition & physical parameters

- Plant hardening under protected & automated greenhouse @ 20 acre
- Auto Irrigation & Fertigation system
- +400 trained Technicians for cloning and propagation and plant hardening
- Integrated ERP enabled production system
- Environment & Health Safety is top priority

ISHVED RESEARCH AND DEVELOPMENT CENTRE

At IshVed group of companies, R&D is a classified unit, staffed by proficient scientists for developing new products. We have 7000 sq. ft. facility with modern instrumentations and networking support only for Research and Development. We at IshVed Biotech always believe in evolving through innovations and the quest to come up with nothing but the best is something that keeps us stay well ahead of the industry.

RESEARCH DIVISIONS:

- Molecular Genetics & plant Breeding
- Virology lab for in-house virus indexing
- Nanotechnology lab
- GOT lab facility

ISHVED CROP SCIENCE

Hybrid seeds

We are operating in

**INDIA'S
LARGEST SEED
PRODUCTION HUB**

Production and sales license of more than 40 varieties of hybrid vegetable & field crop seeds

Diverse Product Portfolio (Elite Germplasm Sources)

Export Quality Hi-Tech Seeds Production Facility

High quality and assured large scale hybrid seed production

Testing carried out across all seasons, & various other geographies across the globe

Operations active PAN Asian, African, European and American Continents

Large Scale Seeds Production capacity with highly skilled labor

Highly Skilled, World-class Experienced Breeding & Scientist Team

Fully Irrigated Research and Variety Trial Farm

High quality seed production programme

**WELL DEVELOPED, FULL IRRIGATED, 50 ACRES
RESEARCH FARM**

ISHVED LIFE SCIENCE

ISHVED LIFE SCIENCE IS ONE OF THE BIGGEST MANUFACTURERS OF BIO-FERTILIZERS, BIO-PESTICIDES, ORGANIC FERTILIZERS AND PLANT GROWTH REGULATORS (PGR)

• We have the Production Capacity of 300 MT per month

• We have well trained 40+ Experienced technicians, Scientist, senior Scientist and Support Team to Develop this products.

• We have the infrastructure on 8 Acres Area Where we are producing our Ishved life Science Products.

• Currently, More than 1 lakh farmers are using Ishved Life Science products

• We assure the Quality products to increase 20 to 25 % yield as well as Maintain the soil Condition.

• Bio Fertilizers are substances that contain microorganisms, which when added to the soil increase its fertility and promotes plant growth.

ISHVED BIO FERTILIZERS

- Acetobactor
- Azospirillum
- Azotobacter
- Rhizobium
- Carrier Based Consortia
- Liquid Consortia
- Mycorrhizal Biofertilizers
- Phosphate Solubilizing Bacteria
- Potassium Mobilizing Biofertilizer(KMB)
- Phosphate Solubilizing Fungal Biofertilizer
- Zinc Solubilizing Biofertilizer

ISHVED ORGANIC FERTILIZERS

- Bio-enriched Organic Manure
- Bone Meal Raw
- Bone Meal Steamed
- Organic Manure(N+ P+ K >3.0%)
- Phosphate Rich Organic Manure
- Vermicompost(1:0.8:0.8)
- Non edible De-oiled Cake

HOW DOES ISHVED BIO FERTILIZERS HELP US?

Retains moisture, and lock the nutrients

Increases microbial life

Improves soil aggregate structure

Absorbs residues of pesticides & heavy metals

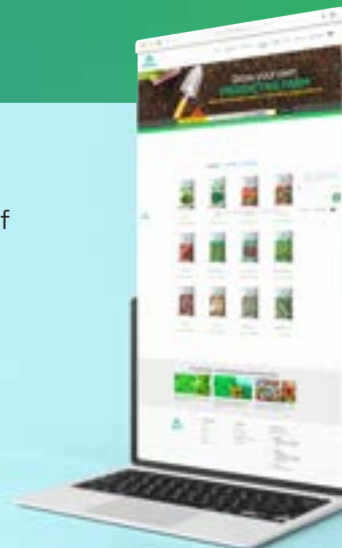

ISHVED MART

The E-Commerce Portal

www.ishvedmart.com

- In-House online E-Commerce portal for all the business verticals of IshVed group viz: Seeds, Bio Fertilizers and Tissue Culture Plants
- Easy Sign In and Login using only your mobile number and OTP.
- Available in user friendly desktop and mobile versions
- Order status SMS alerts available
- Integrated with multiple payment gateways for every kind of payment methods
- Order history and other details available

IshvedMart App

- User friendly design making it easy to operate.
- Similar features available as on the website

Swift Deliveries

- Technical integration with all the major courier service providers through a single tool
- The tool auto selects the best courier service provider for your order delivery
- This apart we have tie ups with other delivery modes to answer
- “Emergency” situations across all the states.
- Multiple pick up / storage locations to ensure quick deliveries.

State of the art agronomist customer service

- A team of agronomists ready to answer product related queries
- A back office equipped with the “State of the art and latest tools”
- The entire team belongs to farming background education wise
- and family wise having decent experience in the agriculture field.

PRODUCT LINE

Tissue Culture Saplings

IshVed Biotech is certified by Department of Biotechnology (DBT), Government of India.

We are the global leader in producing and supplying export quality tissue culture raised saplings, which ensures uniform and mutation free growth, disease resistance, high yielding plants throughout the year. "You Name A Crop And We Have It" Is Our Bottom-line. Our Quest To Develop New Products And To Continuously Evolve Is Never Ending. We Are Committed To Our Goal Of Customer Satisfaction.

DATE PALM

Ishved Biotech is one of the largest producers and suppliers of premium varieties of dates such as Barhai, Khanezi, Lulu, Medjool, Ganyamee and many more.

BANANA

High yielding, disease resistant, wind tolerant variety - GG9.

SWEET LIME

Varieties like Katol Gold and Nucellar are disease resistant and high yielding variety.

LEMON

Varieties like Kagzi, Phule Sharbati and seed-less lemon are disease free, high yielding and fruits are generally larger and more attractive than other varieties.
